PROFILE

Aspiring Data Science and AI Engineer with hands-on experience in machine learning, data preprocessing, and AI workflow evaluation using Python. Strong foundation in data cleaning, visualization, supervised learning, and analytical problem-solving. Comfortable reviewing structured and unstructured data, validating AI-generated outputs, and working with modern AI tools and workflows including Generative AI. Skilled at writing clean, well-documented code and collaborating in team environments.

AREAS OF INTEREST

Machine Learning, Data Analysis, Deep Learning (Basics), NLP, Generative AI, Data Visualization, Data Quality, AI Output Validation, Document Processing

ACADEMIC HISTORY

APJ Abdul Kalam Technological University

Nov 2022 – May 2026

B.Tech in Computer Science

Carmel College of Engineering and Technology

PROJECTS

Multimodal Depression Detection System

Python, Pandas, NumPy, Scikit-learn, NLP

- Built a machine learning system combining smartwatch sensor data and textual data for classification tasks.
- Reviewed, cleaned, and preprocessed structured and unstructured datasets including time-series and text data to improve model consistency and evaluation quality.
- Applied supervised learning techniques and evaluated models using performance metrics.
- Implemented basic data visualization to understand patterns and improve model performance.
- Documented workflows, reviewed model outputs, and collaborated on iterative testing to improve prediction accuracy and data reliability.

Crop Recommendation System

Python, Pandas, NumPy, Scikit-learn

- Developed a supervised learning model for crop prediction based on environmental features.
- Conducted data preprocessing, feature engineering, and model evaluation.
- Achieved 97% accuracy and improved performance through hyperparameter tuning.

EXPERIENCE

AI/ML Intern

June 2025 – July 2025

ICT Academy of Kerala

- Assisted in building and training machine learning models on real-world datasets.
- Worked on data preprocessing, cleaning, and exploratory data analysis.
- Used visualization tools to interpret data and support model improvements.
- Collaborated with team members to solve practical data science problems.

SKILLS

Programming: Python, SQL, Java

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Core Concepts: Supervised & Unsupervised Learning, Regression, Classification, Model Evaluation, Data Verification, AI Output Review, RAG, Fast API

Tools: Jupyter Notebook, Google Colab, Git, GitHub, Power BI, Excel

Other: Problem Solving, Team Collaboration, Communication, Technical Documentation
